DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 08/15/2005 have been fully considered but they are not persuasive.

Bauwens'I76 discloses a bicycle power supply (see Fig.1) with a power switch operatively coupled to the battery unit (9), power switch is a switch that actually provides the operating power to the electrical components.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-4, are rejected under 35 U.S.C. 102(b) as being anticipated by Bauwens US patent 4,860,176.

Bauwens'176 discloses a bicycle power supply (see Fig.1) apparatus comprising: a battery unit (2, column3,line 9,Fig.5 and 6) for storing power from a power supply (1, generator column2,line 14,Fig.5 and 6) for supplying power to electrical components (see Fig. 5 and 6), a power switch operatively coupled to the battery unit (8,9, column 3,line 9,Fig 5) for selectively switching power from the battery unit to the electrical components and a first switch control unit that power supply and controls the power receives power (19,column 3,line 34, Fig. 6) from the switch according to the power received from the power supply ,wherein the first switch control unit is structured to

Application/Control Number: 10/708,892 Page 3

Art Unit: 2834

receive power from the power supply in parallel with the battery unit (8,9, column 3,line 9,Fig 5), wherein the battery unit is structured to receive power from an alternating current generator. (1), further comprising a first rectifier (5',column 3, line 13, Fig.5), wherein the battery unit powers the second switch control unit (9 see Fig. 5) and the battery unit powers the second switch (19, Fig.6) control unit through the power switch.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: Claims 5-14 are allowed.

Regarding claim 5, the prior art of the record in particular Bauwens'176 does not show a supporting structure for a bicycle power supply apparatus comprising: a battery unit for storing power from a power supply and for supplying power to electrical components. wherein the battery unit is structured to receive power from an alternating current generator including inter alia a first rectifier coupled to the battery unit that converts alternating current received from the alternating current generator to direct current that is stored in the battery unit.

Regarding claim 7, the prior art of the record in particular Bauwens'176 does not show a supporting structure for a bicycle power supply apparatus comprising: a battery unit for storing power from a power supply and for supplying power to electrical components. wherein the battery unit is structured to receive power from an alternating current generator including inter alia a motion sensor and a second switch control unit that controls the power switch in response to signals from the motion sensor.

Application/Control Number: 10/708,892

Art Unit: 2834

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE. MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Iraj A. Mohandesi whose telephone number is 571-272-2028. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on 571-272-2044. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
